Contextualisation

English is the international lingua franca, as once were Latin or French. In a globalized world, where we need to move across frontiers not only for pleasure but also for work, English is a key tool to improving our career prospects. In addition, English is the language in which most scientific publications are written. In a context of an increasingly larger European Union, we need English as a tool to communicate with people from different countries and to grow as professionals.

This subject seeks to provide students with a basic grounding in English that will allow them to read and understand specialised publications in English, giving a comprehensive overview of the language, not only from a grammatical point of view but also including a real-life use of it. Students need to be competent not only in writing but also- and even more importantly- orally. That is why this subject will include a considerable amount of conversation and debate in class in which students are supposed to participate actively.

The course will go through various aspects of grammar and include a brief introduction to phonetics, so that students are capable of reading the phonological transcription of the words in a dictionary. Great attention will be paid to technical vocabulary, essential to understanding specialised publications, in the fields of both mathematics and telecommunications.

Requirements

Essential requirements

Essential Requirements: Previous knowledge of English (Batxiller) This subject will be given entirely in English which is why it is essential that students already have level B1 (Council of Europe level) at the beginning of the course. The materials of this course have been selected and designed keeping in mind the level descriptors of English B2 (CEFR).
