## Content

This course is intended to cover the study and analysis of the major strategic decisions taken in a firm. In a world in constant change we believe that the economic approach to strategic management that we take will prove particularly useful. The course will help future managers and directors of the company to apply the economic principles and the analytical skills necessary to evaluate and take strategic decisions, both in the current context as well as to be able adapt to a new environment as the present one evolves.

The core of the course is to study the competitive strategy of the firm, paying special attention to the strategic positioning of the firm. After an analysis of industry and market structure in which the firm has to compete, we aim to understand the basis of competitive advantage, how to achieve it, its origin and conditions for its maintenance over time, paying special attention to innovation. In addition, during the course, we discuss other issues such as firm's growth strategy (corporate mergers, diversification) and the role of ICTs (information and communication technologies) in creating value. Similarly, in a world increasingly globalized, it is essential to study the internationalization strategy of the company. Finally, we discuss the social responsibility of the firm.

### Theme content
