Context

This subject aims to provide students with a general vision about the ways to manage and organize a lodging company.

Lodging is one of the main parts in a tourist package and, consequently, one of the most important areas within the tourism industry of any region.

We will analyse both different types of tourist accommodations and the main models of lodging management. We will pay special attention to the most important business operating models of lodging companies: ownership, franchise, management and leasing.

We will also study the main internal organization, growth and development models of hotel chains; the opening and closing of properties and the use of new technologies into hotel management.

The language of instruction for this course will be English. Students taking this course will learn specific economic/tourism-related vocabulary and develop both their productive and receptive skills in English, and therefore acquire further knowledge of the English language
